AI Sales Copilot for Renewable Installers

Because Nudging is for Humans

21st June 2026

{Tech: Europe} Energy x AI Hackathon – Reonic Path

RAYCIPROCITY

AI Sales Copilot for Renewable Installers

Solar deals die in the silence after the quote.

Reonic gives installers a beautiful funnel — address → 3D → sizing → a polished a polished offer PDF. **Then the offer is sent, and the funnel goes quiet** while the homeowner compares three quotes and the installer is booked solid on rooftops.

20%

baseline quote-to-contract close
close rate — 4 in 5 stall after 'send'
'send'

Felt by small & mid-size solar installers — teams booked solid on rooftops, with no time to personalize follow-up at scale.

RayCiprocity is the AI closing layer on top of the quote — it diagnoses why each deal stalls and writes the persona-matched, multi-channel follow-up in one click.

THE INSIGHT

A family and an investor need to hear completely different things — and no installer has time to write four bespoke sequences per lead. We make persona-tailored, reasoning-backed follow-up a one-click action.

TODAY

One generic template blasted at every lead. A family and an investor get the same email — and most get ignored.

WITH RAYCIPROCITY

Each lead is diagnosed — persona plus why it is stalling — then gets a multi-channel sequence with a reason for every touch.

Paste a customer's objection — watch the whole follow-up re-aim itself in seconds.

The wow: generate a persona-matched plan, synthesize a voice note live with ElevenLabs, then paste a real objection — every unsent email, SMS and call rewrites to address it as the Oracle re-scores sign-vs-ghost.

Five schema-validated AI agents on a multi-tenant core — every message traceable to a diagnosed reason.

The live loop: the “Oracle” scores sign-vs-ghost with evidence, and any inbound objection auto-rewrites every unsent message to address it — in seconds.

For one small installer, closing the post-quote gap is worth $\approx$ €215,000 a year.

$\approx$ €215K

revenue recovered per year ($\approx$ €18K / month)

11 hrs

rep time freed every month ($\approx$ €5.4K / yr)

85%

faster follow-up — 20 min down to 3 min per lead

WHO PAYS

Solar installers — and Reonic, as the recurring-revenue closing module that bolts onto their funnel. Multi-tenant B2B SaaS, per seat.

WHAT'S NEXT

Per-lead RAG (pgvector) over full history · WhatsApp + survey channels · keep-warm cadence · DE/EN A/B strategy variants.

Let's turn quotes into contracts.
